- *It/EN/DE/ to single breeders of Arca-Net (2019)*

7 events, 159 answers (2018)

Questions

- Objectives of Cryoconservation
 - Insurance to recreate/revive a breed or breeding line in danger of extinction > 80%
- Which Breed for Cryoconservation?
 - High degree of endangerment
 - Special traits and characteristics of value
 - Genetic distinctiveness

Questions

- Who shall prioritize and decide
 - Clear prioritisation of a multi actor board
- Impact of cryoconservation on in-situ conservation
 - Conservation of within breed genetic diversity
 - Revitalizing blood lines
 - Collaboration of conservation breeders and research

Questions

- Who should pay?
 - Clearly the national governments
 - EU is not seen as a relevant payer
 - Private breeding organisations should pay for services
- Innovations in biobanking – new technologies
 - Science accepts more invasive technologies than MNGOs and breeding org.
 - In General the acceptance except cloning is bigger than expected
- **Final Results will be published in 2020**

Other projects and actions

- Fundus Agri-Cultura Alpina fundraising running for French version <http://fundus-agricultura-wiki>
- Collection of wild fruits of Europe (The delicate savages; www.wildobst.info)
- Fundraising for proposals on
 - Mocanitza Cattle, Romania / Moldova / Ukraine
 - Aegean Island Conservation Project
- Balusha (Kosovo): Samples will be investigated next winter
- Arca-Deli award: 40 awards since 2012
- eNews: 3300 subscribers

Dos and Don'ts of all SAVE Network Partners

Dos

- **Communication**
- Keep the community informed about your activities:
 - Send reports of your activities for the quarterly eNews
- Use of social media: Strengthen the community and the coverage of the messages through
 - Likes and interaction. Give your messages to the SAVE offices to share them, if you do not
 - publish it through your own account.
 - The SAVE PO And NO are ready to share any questions, findings, news.
 - Participate with your ideas, conflicts and questions at the annual meetings

- **Alarming**
- if you get information relevant to the European stakeholders, tell it. This is also relevant for
- regional cross-border incidents and actions.
- **Media/Public Communication**
- In statements, releases and/or declarations on current events related to agrobiodiversity at
- transnational or EU level, the SAVE Network agrees on a common formulation or an identical
- wording, in particular for the media.

- **Cross Border Project Implementation**

- If you act cross-border inform your SAVE partner across the border about what you plan to do to
- avoid misunderstandings and strengthen a collegial cooperation.

- **Fundraising**

- The SAVE PO and NO inform all partners about relevant fundraising opportunities as soon as the
- offices get information. The Network partners inform the SAVE offices and/or partners about any
- fundraising opportunities relevant for the network.

Donts

- **Promotion and Protection of a Breed/Variety**
 - If you create a label to promote a breed/variety be careful: You can make a protection on products, but not on the breed itself. The latter leads to a ban of use of the breed outside the label.
 - community what is diametrically opposed to the SAVE network principle of dissemination of breeds and varieties.
- **Fundraising**
 - Avoid concurrence with the network partners through fundraising in the region of activity of the SAVE partner without information and/or inclusion of the network partner.

**Thank you very much for your
collaboration**
